

## Welcome New Member

Your **administrators, moderators,** and the **general membership** would like to welcome you to the SVX World Network. It is our intent for you to get started off on the right foot, so the following information should help you get the most out of the site.

There are a number of navigation buttons that can be used to get to different places on the site. On the top left of the page, you can see where you are on the site. For example:

The Subaru SVX "NETWORK" > User Control Panel For "your name"

If you want to go back to the main page, click on the far left "Network" and you will go there.

To set up your Profile, click on one of the blue buttons at the top right "User CP".

This will take you to more options. If you choose "Edit Profile", it will take you to a page that you can add your signature, home page, url, and other information. After you add or change anything, Click on "Save Modifications".

If you click on "Edit Options", you can set up how you want your page to look and other options. Select what you want and then "Save Modifications"

You can access your buddy list and private messages from here too. Try these options out and if you have any questions, ask a moderator for help if needed.

There are Forum Titles listed on the Forum Site. By clicking on each one, you will go to the different forums which have individual threads (discussion subject) by different members on different topics. By clicking on the thread, you will be able to read the posts by the members on the topic.

After you read all of the current posts, if you click on the line that says "Mark all posts read" at the bottom of the page, the next time you log back on, you can see all of the new posts easily by clicking on the "View New Posts" under the Welcome Back (your name). When you click on this, it will bring up all of the forums that have had a new post after you were there last. If you click on the "Got to Last Unread Post", it will take you to the last post you saw and you can see the first one that is new. After reading that one, or others, if you click on the Back navigation button, it will go back to the list of unread threads. Continue doing this until all of them have been read, and then Mark them all read.

You can respond to the post by clicking on the "Post Reply" button after the last post. When you have put your response in the box, click on "Submit Reply".

One of the more important locations on the site is the How-To Documents. It is one of the choice lines at the top right of the page. It has lots of directions on How-To do things. Go there first if you have a question.

One other way of accessing information is the Search key. This allows you to search for information and get it very quickly. It is much faster than posting a question and waiting for an answer if it has already been covered in the past. Try it, you will like it.

Good luck and enjoy the site. We do, and try to keep this a friendly family type site. Language is censored when possible so we do not offend members. Please read the rules when you can and if we all obey them, it will make this a much better site. Thank You.
